

Alex Burton

Software Engineer

SUMMARY

Creative, detail-oriented, software engineer with a deep interest in internet security. Proven track record of creating and implementing robust front and back end web applications. Looking to contribute to a team of like minded developers to build a more secure internet for a our future.

WORK EXPERIENCE

Owner/IT Consultant, Creekside Systems | San Bernardino County, CA

January 2018 — Present

- Worked close with contracted clients who need varying IT infrastructure support.
- Built semantically structured full stack web applications to support company endeavors.
- Actual Clients – Cascade of Empowerment, Feel Free 2 Feel Free, Beyond the Barbershop

Recent Projects:

JS Radio – An open source fullstack web application built with Express.js, Mongodb atlas, and pushed to Heroku's cloud hosting services, that offers online radio broadcast services via the Worldwide Radio API.

The Pi Box (Multipurpose Network Server) – An all in one server solution that acts as a password management system, a VPN access point and an SFTP server for secure file sharing across a tightly maintained network.

Other Projects: A status bar to give regular bitcoin price updates, Creekside Capital Management website, Binary to Decimal Converter for CLI, and many more

Software Engineer, 100devs | Los Angeles, CA

October 2020 — Present

- Collaborated with a global team of developers to build modern and responsive web applications using best practices
- Applied agile methodologies like SCRUM for project management across varying time regions

Web Developer, Feel Free 2 Feel Free | Corona, CA

June 2018 — September 2019

- Developed and maintained the core website for the Feel Free 2 Feel Free Yoga Organization that supported booking, email outreach, and building an overall online presence.

VOLUNTEERING

Feel Free 2 Feel Free | Corona, MA

March 2018 — Present

A regular contributor to developing health and wellness for underprivileged youth through the practice of yoga.
